# Basic ESD chairs

Standard ESD chair, covered with high-quality conductive fabric ( $R_g < 10^6 \Omega$ ). The chair has a five-branched base made of chromium-plated steel. It ensures high stability and unfailing removal of electrostatic charges. The seat and the backrest are made of highly elastic foam. The backrest can be adjusted in three planes. Height adjustment can be achieved thanks to a gas column, providing two chair heights to choose from. The chair can be equipped with conductive wheels or sliding feet, and additional accessories. The chair has a certificate of safety and ergonomics of use.

# ESD Comfort chairs

This chair is characterized by an increased comfort of use, and is covered with high quality, conductive fabric ( $R_g < 10^6 \Omega$ ). The chair has a five-branched base made of chromium-plated steel. It ensures high stability and unfailing removal of electrostatic charges. The seat is made of profiled, highly elastic, casted foam. A synchro mechanism has been adapted to provide more individual settings of the chair. Profiled backrest has height and angle adjustment possibilities. Height adjustment can be achieved thanks to a gas column, providing two chair heights to choose from. This chair can be equipped with conductive wheels or sliding feet, and additional accessories. The chair has a certificate of safety and ergonomics of use.
